

Why do we want to control Drivers Licenses and ID cards?

Driver licenses and ID Cards become "breeder documents" which allow the recipient to obtain additional documents, based upon the false premise that he is a U.S. citizen.

For example, all of the 9/11 hijackers had driver's licenses or state-issued (ID) identification cards, which they then could use to open bank accounts, rent housing, board planes, buy guns, obtain other documents normally carried or obtained by a U.S. citizen.
